

Arunachalam Thangappa

DevOps & Infrastructure Engineer | • Chennai

PROFESSIONAL SUMMARY

DevOps & Infrastructure Engineer with over 4 years of experience designing secure, scalable cloud architectures on AWS. Expert in Kubernetes, Terraform, mTLS implementation, and GitOps workflows. Modernizing legacy infrastructure and enhancing security posture for fintech and IoT sectors.

EXPERIENCE

> Sedin Technologies, Chennai— DevOps Engineer

NOV 2024 - PRESENT

- Toyota Connected:
 - Engineered a **Zero-Trust mTLS** architecture for Vehicle-2-Grid (V2G) communication, utilizing AWS Private CA and Transit Gateway to secure inter-VPC traffic across multiple AWS accounts.
 - Engineered a double TLS setup with **Ingress-NGINX** to support path-based routing alongside mTLS, offloading TLS at ingress, routing based on headers, and re-encrypting traffic to backend services that also enforce **mTLS** internally.
- UDS - Chennai Metro:
 - Designed and implemented an EKS-based infrastructure to modernize a legacy EC2-hosted IoT platform, integrating **EMQX-MQTT broker**, RDS, and **RabbitMQ** to handle real-time sensor data ingestion and processing at scale.
 - Built end-to-end CI/CD pipelines using AWS CodePipeline, automating containerized service deployments to EKS with **ArgoCD**, improving release velocity and reducing manual intervention.

> Tazapay, Chennai— Associate DevOps Engineer

FEB 2024 - OCTOBER 2024

- Developed a comprehensive **Disaster Recovery (DR)** strategy for a microservices-based payments platform, ensuring business continuity and minimizing downtime risks as part of **PCI-DSS & MAS-Technology Risk Management Guidelines**.
- Fortified payment platform security by implementing Web Application Firewall (WAF) rules, successfully neutralizing active DDoS attacks and

TECHNICAL SKILLS

Cloud & IaC: AWS (EKS, Private CA, Transit Gateway), Terraform Cloud, AWS-CDK-GO, Google Cloud APIs.

Containerization & Orchestration: Kubernetes (EKS, GKE), Docker, Helm, Ingress-Nginx.

CI/CD & GitOps: ArgoCD, Flux, CircleCI, Github Actions, BitBucket Pipelines, Google Cloud Build, Jenkins, AWS CodePipeline.

Observability: Prometheus, Grafana, Loki, ELK Stack (ElasticSearch, LogStash, Kibana), OpenTelemetry.

Scripting & Backend: Go, Node JS, Bash, Python.

ensuring 99.99% uptime for critical financial transactions.

- Migrated MongoDB Atlas Clusters inside a self-hosted VPN.
- Migrated logging solution to sumologic with Fluent Bit and Metrics & Traces with **OpenTelemetry Collector**.
- Upgraded CI/CD pipelines to incorporate semantic versioning by decoupling proto-file management, resulting in cleaner dependency handling and release processes.

> ShelfPerks, Chennai— *DevOps & Infrastructure Engineer*

NOV 2022 - FEB 2024

- Containerized cloud-native frontend and multi-tenant backend applications using Docker, and maintained Infrastructure as Code (IaC) workflows in a GitOps fashion.
- Developed a custom domain reseller portal using OpenSRS, featuring automated DNS templating and dynamic Ingress creation to efficiently route traffic for multi-tenant users.
- Fortified data security by migrating MongoDB Atlas Clusters into a self-hosted VPN environment and enabling Private Service Connect for secure third-party application integration.

> ShelfPerks, Chennai— *Jr. DevOps Engineer*

NOV 2021 - OCT 2022

- Automated SSL certificate lifecycle management using cert-manager with DNS01 and HTTP01 solvers, reducing manual maintenance overhead.
- Maintained the Developer Portal and Internal Operations Platform for RC Management, Build Promotion & User data analytics.
- Worked closely with a multidisciplinary team to develop and document offline payments solutions.
- Designed & Implemented a **Billing & Subscriptions service** for online SaaS products with **Stripe** APIs & Webhooks in **Node JS**.

EDUCATIONAL PROFILE

PGD: Counseling & Psychotherapy	University Of Madras	2020-2021
M.Sc Psychology - I Class	University Of Madras	2020-2022
B.E Mechanical- [8 CGPA]	MNM JEC, Chennai	2015-2019
